

## Creation of the Katseye Blends

The blends are developed by exploring the complex relationship between oils, in the context of a synergistic blend and the therapeutic variations between each plant species.

Using the highest grade of essential oils for health and wellbeing.

Created by a Clinical Aromatherapist and using the services of a Biochemist to ensure the highest therapeutic value and purity available. And chosen for their healing properties.

Buying 'pure' oils is easy, buying therapeutic grade oils is not so easy.

The blends are not diluted and are free of adulteration and contamination. And are sourced from around the world. They are very complex mixtures of essential oils combined in a unique way and blended with the care usually associated with an expensive perfume but with therapy rather than fragrance in mind.

Created more like perfumery than traditional British Aromatherapy. And as a perfume has a

Top, Middle & Base note. The blends have; a first therapeutic note, a deeper therapeutic note and ultimately a longer lasting therapeutic effect.

This is what makes the blends unique.

All natural plant extracts controlled to the highest levels of purity.

Developed from a Holistic perspective and with deep consideration to all levels of a person's Being; Physically, Emotionally, Mentally & Spiritually

(Handmade Products. Not Tested on Animals – Cruelty Free)
